Maybe you've heard of Arweave

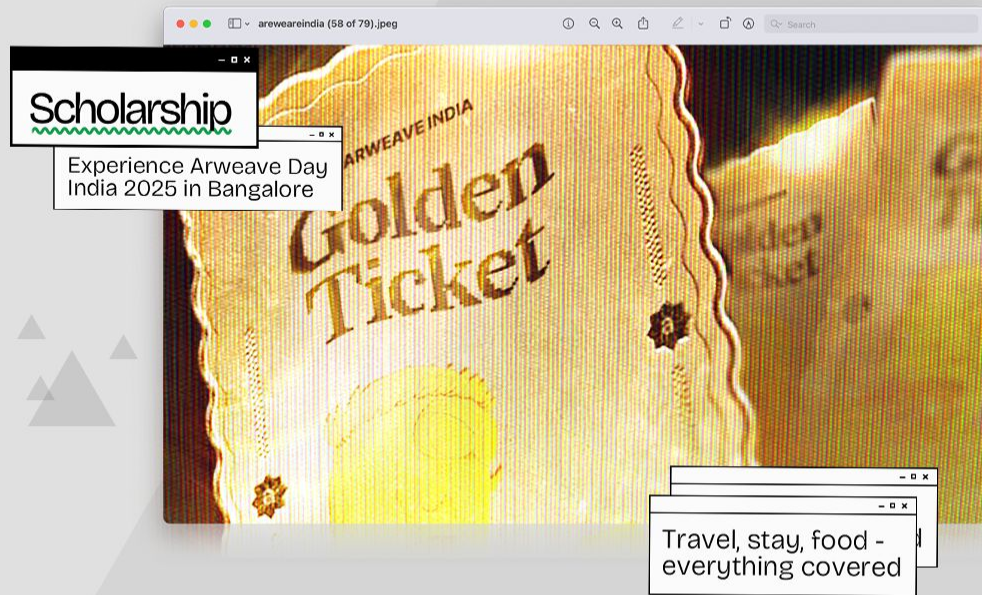

Maybe you've of Arweave

What are your goals?

What's up for grabs?

Bengaluru, India
April 24-25-26

Arweave Day India

A multi-day experience that brings together
people from the Arweave and AO ecosystem
for the best discussions

Geek out over building a
decentralised internet

#1

WORLDWIDE

for new developer
onboarding since 2023

Have you heard the news?

India has great devs!

#2

WORLDWIDE

market share for all
crypto developers

11.7%

share of all
crypto devs

Arweave India : Fully Activated

Capturing our impact over the span of 18 months

In-person Attendees

10000+

90+

In-person
Hacker House
alumni in India

3

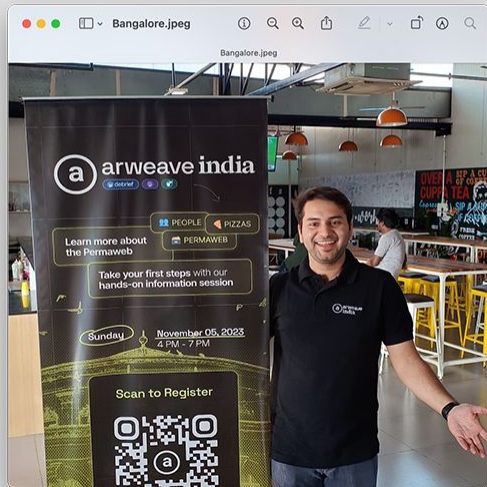

Quarter-long
Incubator Programs

50+

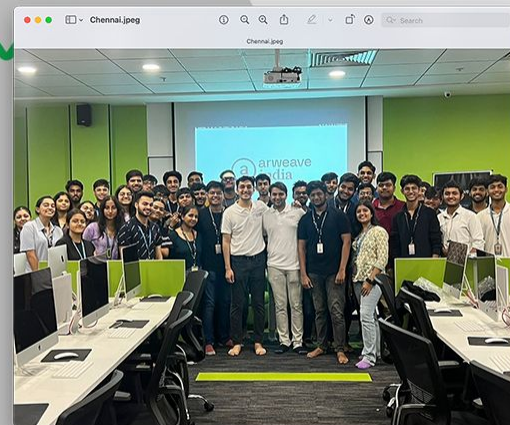

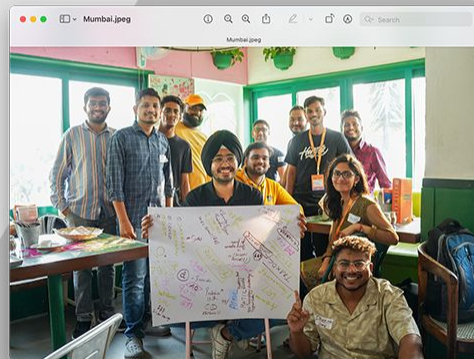

IRL Events

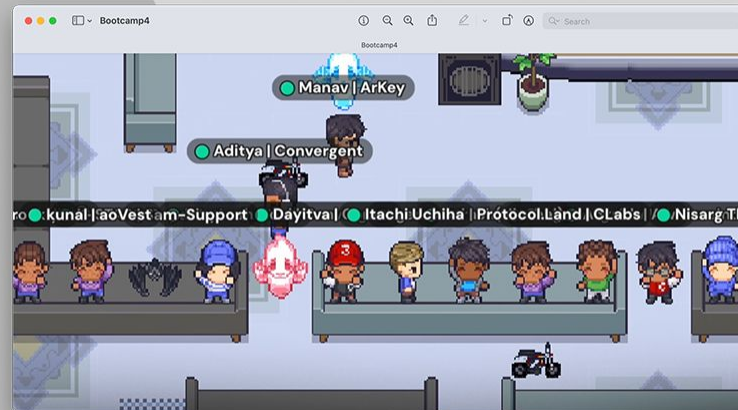

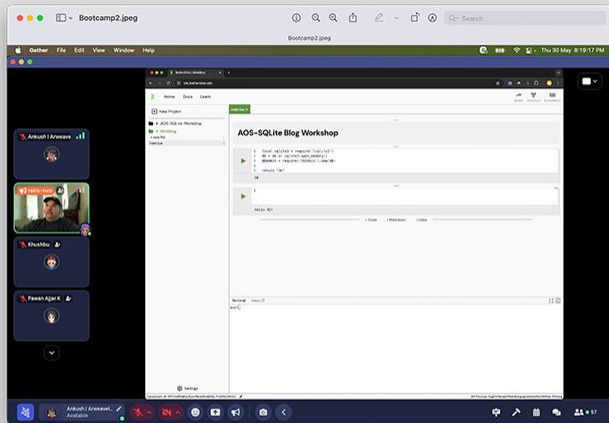

and great frens across Bengaluru, greater India
and beyond :)

Launchpad

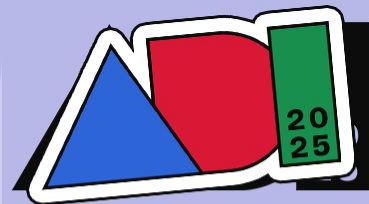

Demo Day

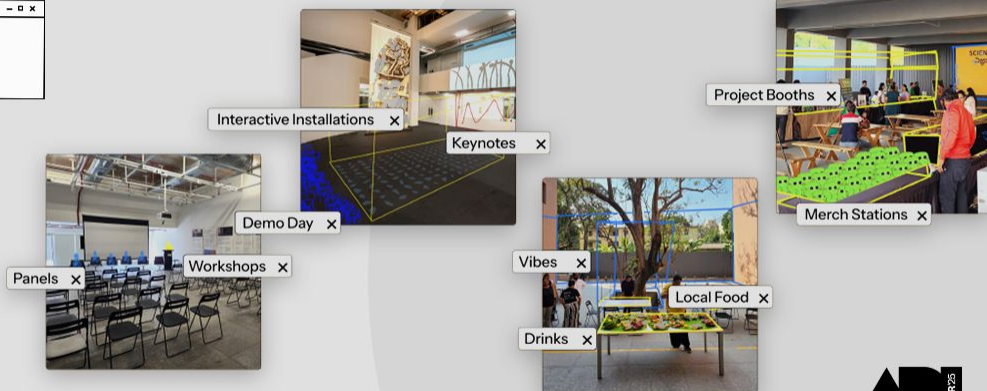

India is calling, it's go time!

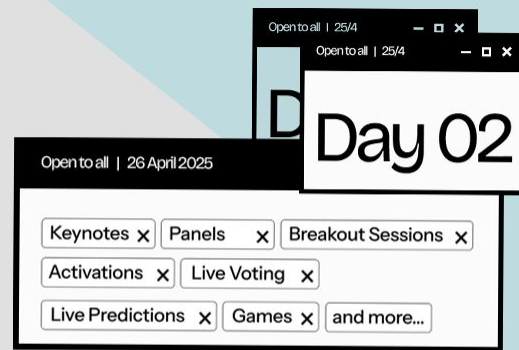

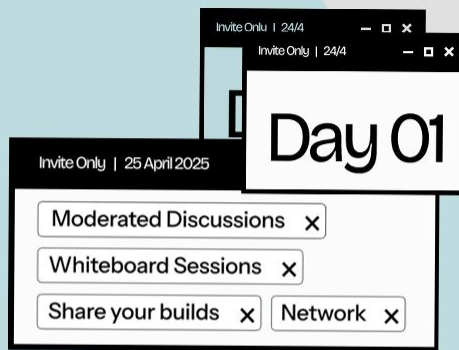

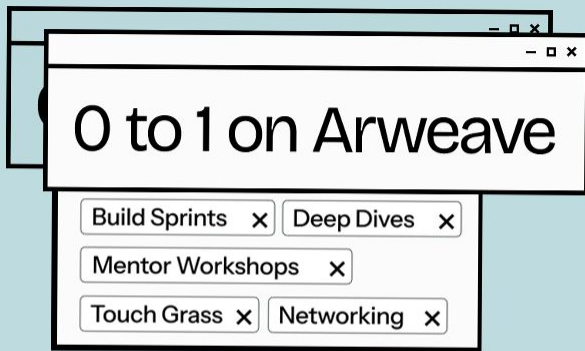

So we're doing ADI in a Science Gallery

Science Gallery,
Bengaluru, India

So what happens

at ADI ?

22 Mar - 6 Apr

7 - 16 Apr

23 - 26 Apr

ADI Tour

A tour with stops in 10+ cities across India and select locations worldwide feat 101s, hands-on workshops and games

Build Sprint

A two-week hackathon/build sprint with dedicated IRL workstations to help you build your MVP and go from 0 to 1

Hacker House

A dedicated IRL hacker house with the shortlisted arweave/ao builders under one roof.

The journey up to the event is designed to support your build journey and deepen your knowledge of the ecosystem.

ADI 2025 isn't a standalone event

YOU WILL NEED TO LEARN ABOUT ARWEAVE AND AO

LEVEL

Think of Arweave as a public library for the internet. Instead of keeping books, it stores websites, photos, and other digital information.

Once something is

LEVEL

Imagine you have a box that holds all your drawings and toys. No matter what happens, they remain safe in that box permanently. Arweave is like that box, but it's a collec...

Arweave is a decentralized protocol that's designed to store data permanently.

A NEW ERA OF DATA
PERMANENCE

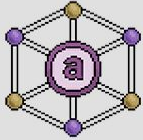

AFTER 6 YEARS, ARWEAVE MAINNET NOW HAS

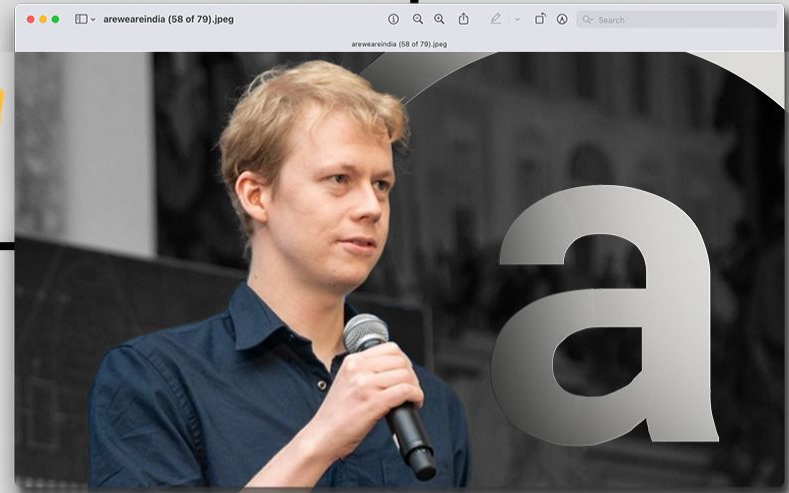

TRANSACTIONS

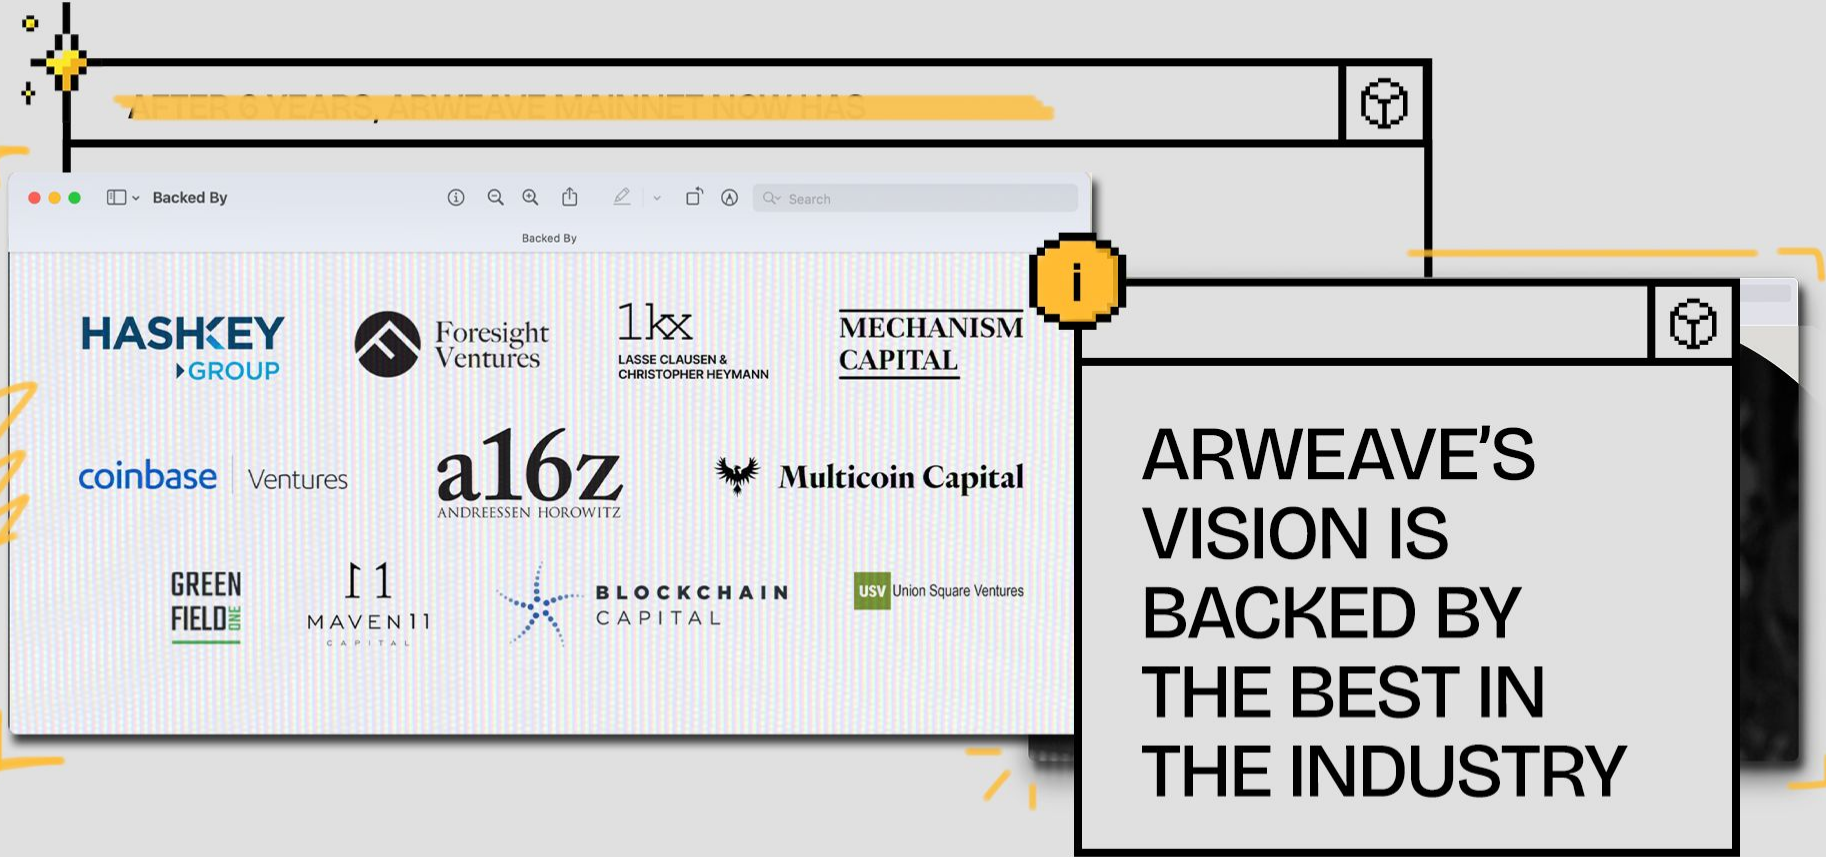

~16 BILLION

NETWORK SIZE

~280 PETABYTES

The image shows a stylized screenshot of the Arweave website. The browser window has a title bar with a yellow pixelated cursor icon. The address bar shows a URL that has been redacted with a yellow brushstroke. The page content is titled "Backed By" and features a grid of logos for various investors. A yellow pixelated information icon is positioned to the right of the investor logos. To the right of the browser window is a large white box with a black border containing the text "ARWEAVE'S VISION IS BACKED BY THE BEST IN THE INDUSTRY".

AD, HYPER PARALLEL
COMPUTING AT YOUR
FINGERTIPS

Processes interact via messages

Messages connect the processes into a “web” (like hyperlinks connect websites).

Holographic state

Every process has a state that can be evaluated independent of other processes.

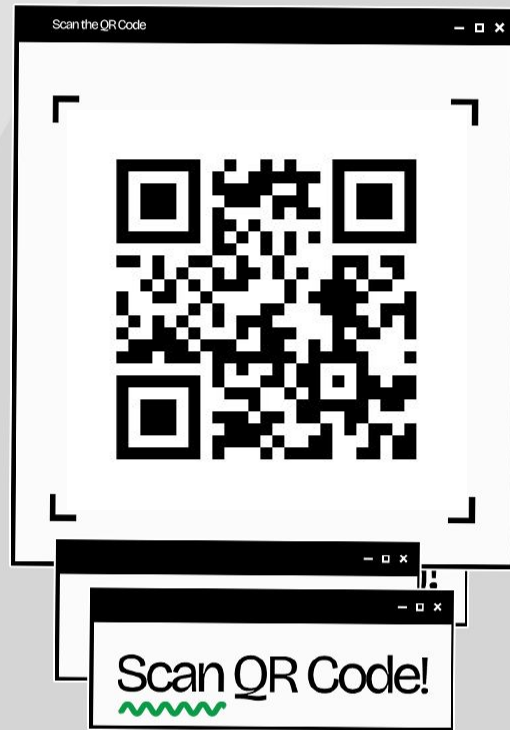

Single unified computing environment

Network of nodes together create unified environment.

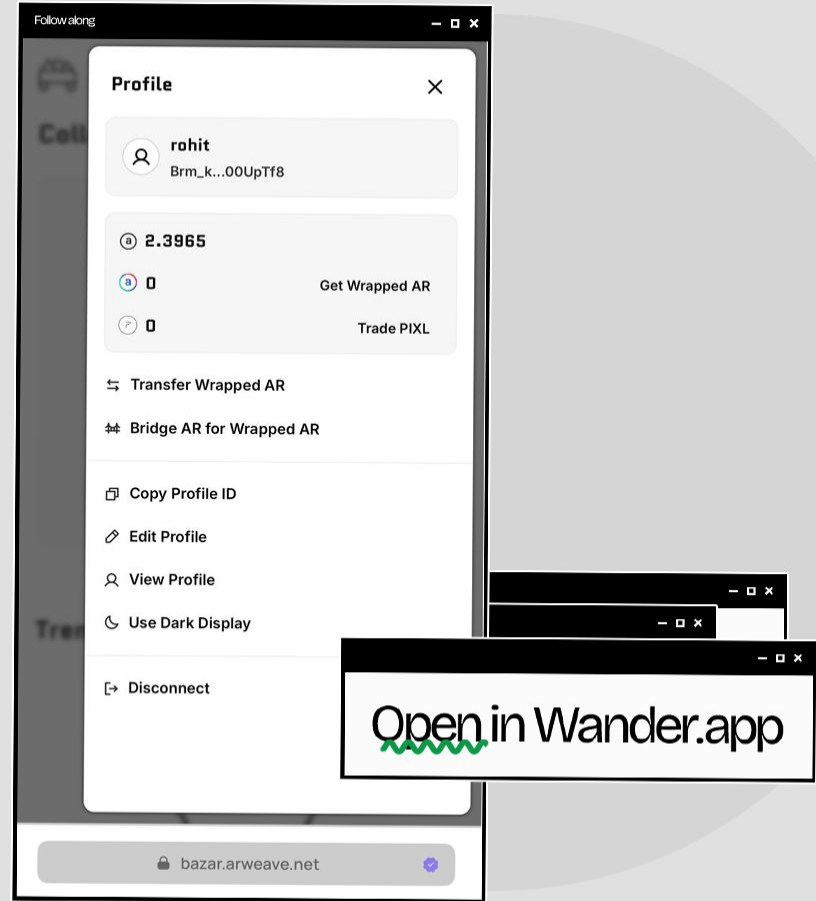

Nodes running ao units (MUs, SUs, CUs)

Built on the Arweave network.

Install ArConnect on Mobile and Setup account

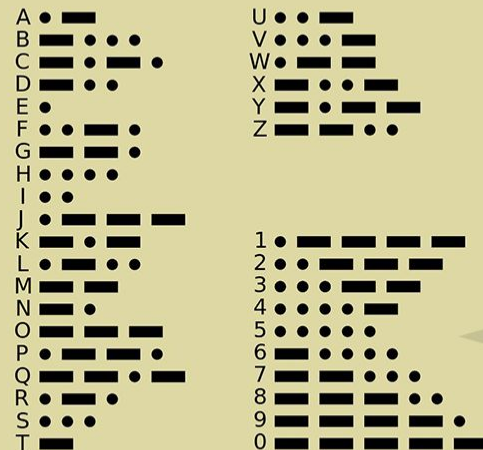

Create a Bazar Profile

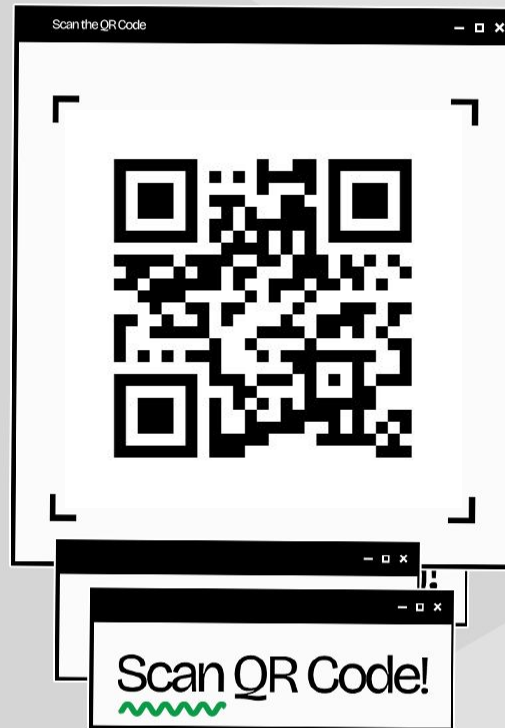

Hands-on Building :

We're going to learn to work with AO
by building a Morse Code Decoder

Go to BetterIDEa and create a new project

ide.betteridea.dev

Basic LUA Syntax

Variables in Lua

```
> a = "xyz"; print(a)
```

Functions in Lua

```
> function ()  
-   print(a)  
- end
```

Handlers

```
> Handlers.add(  
-   "pingpong",  
-   Handlers.utils.hasMatchingData("ping"),  
-   Handlers.utils.reply("pong")  
- )  
-  
> Send({ Target = ao.id, Data = "ping" })  
> Inbox[#Inbox].Data
```

Code to kick off morse learning process

Sending a message

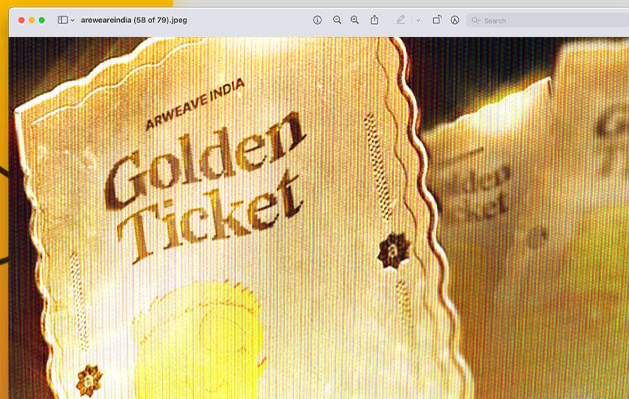

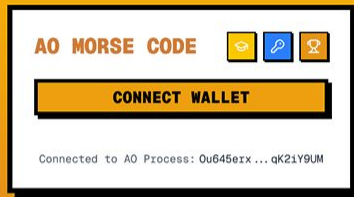

```
> Send({ Target = "hUoAOUrWA0VOvNW4IGFALJ6qUPnY2T1jfBkHLAZ5wz0 ", Action = "Let's Roll!" })  
> Inbox[#Inbox].Data
```

How to keep going with the self learning

Conversing with the process through the terminal

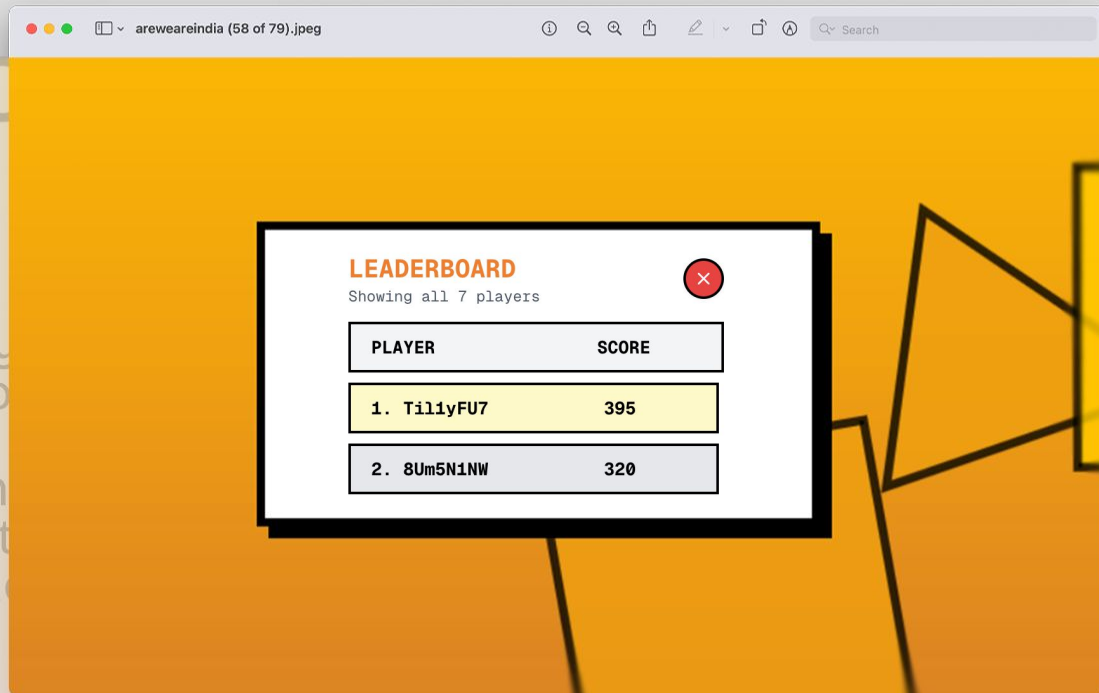

```
> Send({ Target = " hUoAOUrWA0V0vNW4lGFALJ6qUPnY2T1jfBkHLAZ5wz0 ", Action = "Next Step" })  
> Inbox[#Inbox].Data
```

Morse Code Game to Win the Golden Ticket

How to go about

1. There are multiple rounds.
2. Each round you will be playing (of increasing difficulty, more)
3. You must enter what you hear of the buttons (make sure to enter between the various characters, for example .- "space" ...

ALL THESE GAMES ARE BUILT ON
ARWEAVE AND AO

    -- Sending Dummy Data for now as there are some issues
    -- ao.send({
      Target = _ORBIT,
```

The collage features several overlapping digital elements:

- Browser Window:** Displays a webpage titled "areweareindia (58 of 79).jpeg". The page has a green background with a cartoon cat and the text "the easiest way to develop on ao". A yellow pixelated 'i' icon is on the right.
- Tweet:** From **BetterIDEa** (@betteridea_dev), stating "Streamlining the developer experience on @aoTheComputer". It includes a large green play button icon.
- Code Editor:** Shows a file explorer with folders like "GraphicalPlots", "FutarchyProposals", "OutcomeGG", and "Alvon". Below it, a code snippet is visible:

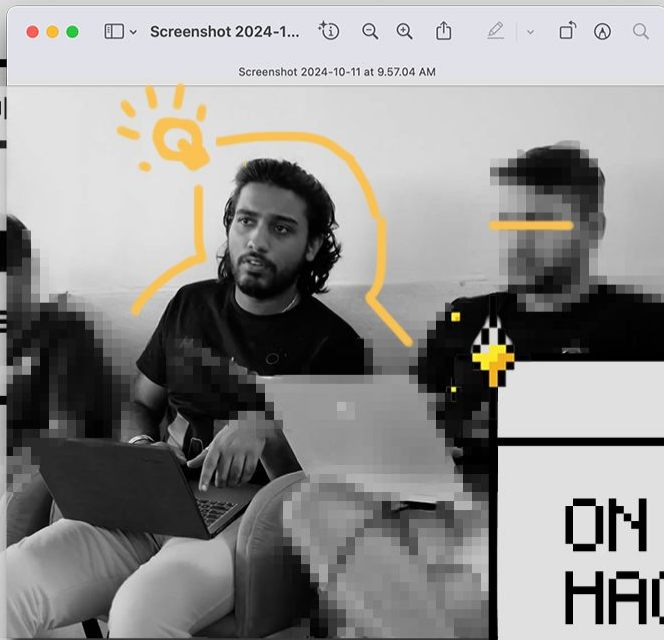

```
-- table.insert(REQUESTS, msg.From)
-- Sending Dummy Data for now as there are some issu
-- ao.send({
--     Target = ORBIT,
```
- Sign:** A large white sign with black pixelated text that reads "ACQUIRED TO BE MAINTAINED AS AN OPEN SOURCE INITIATIVE".

Story 2

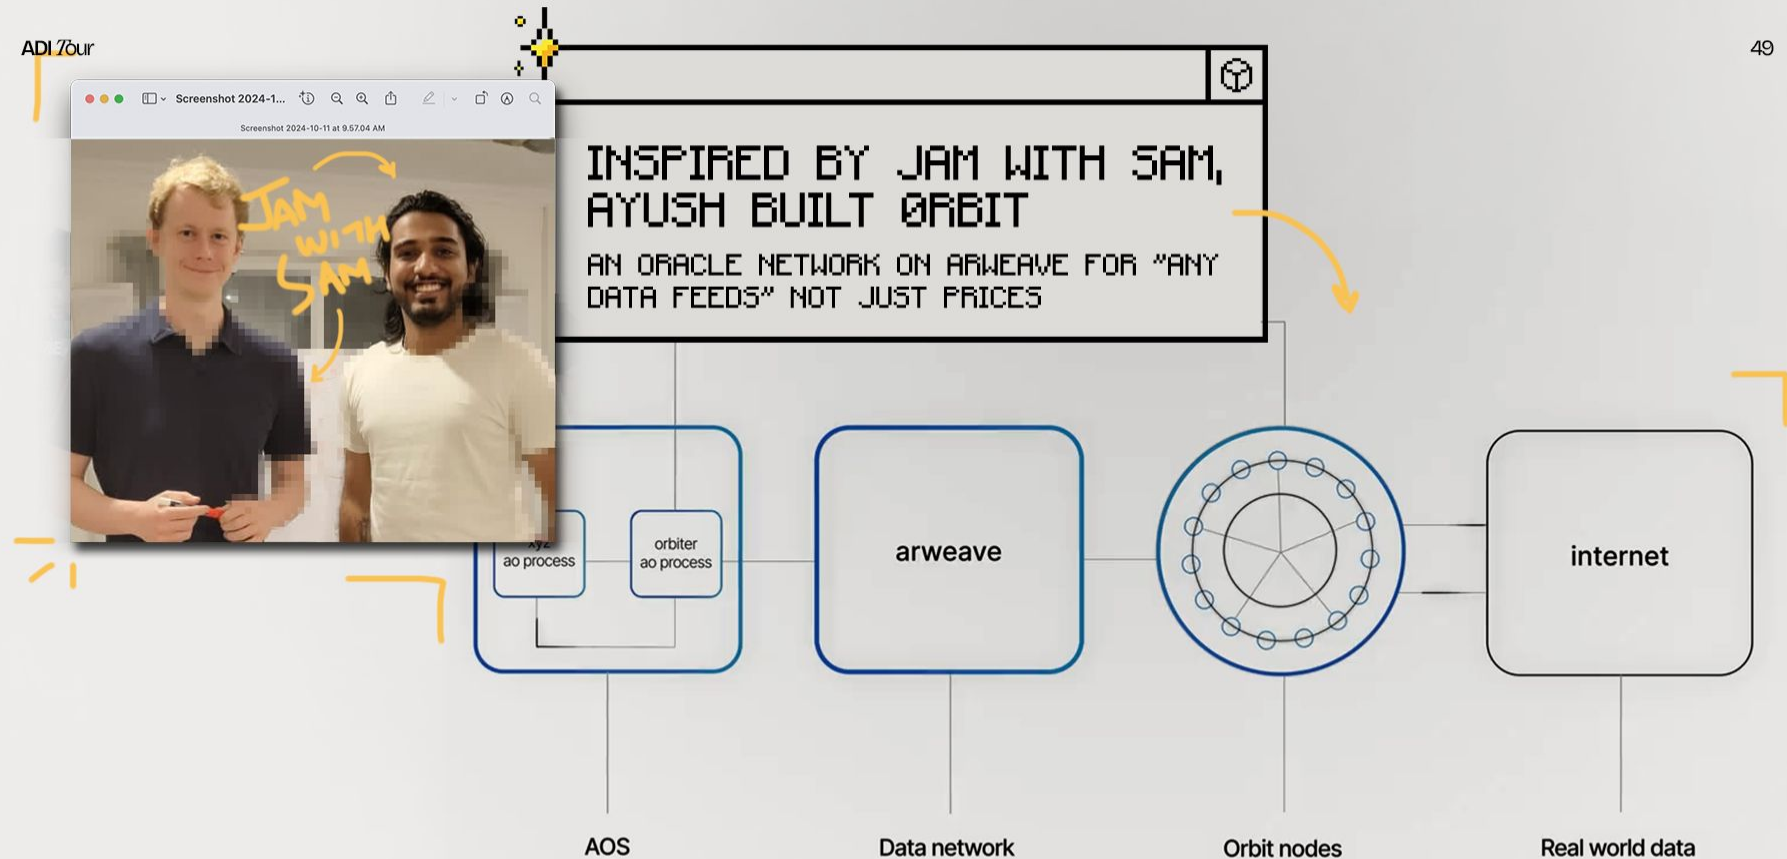

AYUSH

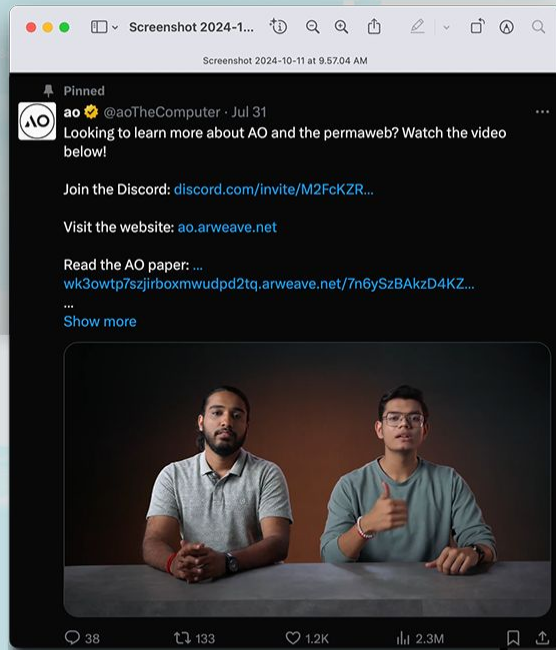

Final Year Student

ON THE FINAL DAY OF THE
HACKER HOUSE, HE BUILT A
SOLUTION TO PORT DATA
FROM 53 TO ARWEAVE

ED BY JAM WITH SAM,
BUILT ORBIT
NETWORK ON ARWEAVE FOR "ANY
5" NOT JUST PRICES

ORBIT TOO SHOWCASED
ON A GLOBAL SCALE AND
RECEIVED FUNDING
